Response to Amendment

1. The amendment filed on October 24, 2005 has been entered.

Allowable Subject Matter

2. Claims 1-7 are allowed.
3. The following is an examiner's statement of reasons for allowance:

Regarding claims 1-7, none of the prior art of record discloses or makes obvious an x-ray detector assembly as disclosed in claim 1, namely that the encapsulating layer is composed of immediately adjacent organic layers of mono-chloro-poly-para-xylene and poly-para-xylene. References such as Homme (US Patent 6,278,118 B1, cited in previous office action) disclose a detector comprising a substrate with a detector matrix, a scintillator and an encapsulating coating with two organic layers separated by an inorganic metallic layer. The present invention requires that within the encapsulating layer, the organic layers are immediately adjacent, meaning that there are no additional layers between the organic layers.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
